DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Hori et al. (A New Branch Metric Generation Method for Soft-Decision Viterbi Decoding in Coded OFDM-SDM Systems Employing MLD over Frequency Selective MIMO Channels, IEICE Transactions on Fundamentals of Electronics, Communications and Computer, Institute of Electronics information and Communication Engineering, Tokyo, JP., vol. 7, no. E85-A, July 2002, pages 1675-1684, XP00114147).

As per claim 1, Hori et al. disclosed a 2x2 wireless local area network, having a first and a second single input single output (SISO) system respectively having a first and second transmitter antenna that transmit a first and second transmitted signal s.sub.1 and s.sub.2; a first and second receiver antenna that receive a first and second received signal r.sub.1 and r.sub.2; and a demapping and signal separation module that employs zero forcing to guide maximum likelihood decoding and is connected to said first and second SISO system and is adapted to process said first and second received signal, wherein a data transmission rate of the 2x2 system is greater than 100

Mbps at a bit error rate of 10^{-4} and a computation cost for decoding on the order of the decoding cost for an optimal SISO system (pg. 1675-1684).

As per claim 6, Hori et al. disclosed the first and second SISO system is based on a 54 Mbps IEEE 802.11a SISO orthogonal frequency division multiplexing (OFDM) system (pg. 1675-1684).

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
